

DM-Quiz-2020-Q8

40% (6/15)

-
- ✓ 1. Cluster Analysis is
- ☒ A Unsupervised learning technique
 - ☐ B Supervised learning technique
 - ☐ C I do not know
- ✓ 2. Distance between records and distance between clusters are the same
- ☐ A True
 - ☒ B False
 - ☐ C I do not know
- ✓ 3. Which of these is the measure of between clusters distance?
- ☐ A Single link
 - ☐ B Complete link
 - ☐ C Average link
 - ☐ D Centroid
 - ☒ E All of them
 - ☐ F I do not know
- ✗ 4. Single link is
- ☐ A the smallest distance between an element in one cluster and an element in the other
 - ☐ B the largest distance between an element in one cluster and an element in the other
 - ☐ C the average distance between an element in one cluster and an element in the other
 - ☐ D distance between the centroids of two clusters
 - ☒ E I do not know

- ✗ 5. Complete link is
- ☐ A the smallest distance between an element in one cluster and an element in the other
 - ☐ B the largest distance between an element in one cluster and an element in the other
 - ☐ C the average distance between an element in one cluster and an element in the other
 - ☐ D distance between the centroids of two clusters
 - ☒ E I do not know

- ✗ 6. Which of these is the nested algorithm of clustering?
- ☐ A Hierarchical clustering
 - ☐ B k-means
 - ☐ C Knn
 - ☒ D I do not know

- ✗ 7. Which of these is the unnested algorithm of clustering?
- ☐ A Hierarchical clustering
 - ☐ B k-means
 - ☐ C Knn
 - ☒ D I do not know

- ✗ 8. Which of these is the type of hierarchical clustering?
- ☐ A Agglomerative Methods
 - ☐ B Divisive Methods
 - ☐ C Both
 - ☒ D I do not know

- ✗ 9. This function can be used to perform hierarchical clustering in R
- ☐ A hclust()
 - ☐ B cluster()
 - ☐ C hierarchical ()
 - ☒ D I do not know

✗ 10. This function can be used to perform k-means clustering in R

- ☐ A kmeans()
- ☐ B kclust()
- ☐ C kmenscl()
- ☒ D I do not know

✓ 11. Do we need to worry about scaling in clustering?

- ☒ A Yes
- ☐ B No
- ☐ C I do not know

✓ 12. The goal of Cluster Analysis is

- ☒ A That the objects within a group be similar (or related) to one another and different from (or unrelated to) the objects in other groups
- ☐ B That the objects within a group be different from (or unrelated to) to one another and similar (or related) the objects in other groups
- ☐ C That the objects within a group be similar (or related) to one another and the same for the objects in other groups
- ☐ D To classify the object as similar as did in the data
- ☐ E I do no know

✓ 13. Cluster Analysis can be considered as

- ☒ A unsupervised classification
- ☐ B supervised classification
- ☐ C supervised regression
- ☐ D I do not know

✗ 14. Exclusive clustering

- ☐ A Assign each object to a single cluster
- ☐ B Assign each object to more than one cluster
- ☐ C Assign each object to cluster with the highest number of data points
- ☒ D I do not know

✗ 15. Partial clustering can be considered if

- ☐ A some objects in a data set may not belong to well-defined groups
- ☐ B assigns every object to a cluster
- ☐ C assigns every object to a cluster with some probability
- ☒ D I do not know
