

DM-Spring-2020-Q8-Grade

66.67% (10/15)

-
- ✓ 1. Cluster Analysis is
- ☒ A Unsupervised learning technique
 - ☐ B Supervised learning technique
 - ☐ C I do not know
- ✓ 2. Distance between records and distance between clusters are the same
- ☐ A True
 - ☒ B False
 - ☐ C I do not know
- ✗ 3. Which of these is the measure of between clusters distance?
- ☐ A Single link
 - ☐ B Complete link
 - ☐ C Average link
 - ☒ D Centroid
 - ☐ E All of them
 - ☐ F I do not know
- ✗ 4. Single link is
- ☐ A the smallest distance between an element in one cluster and an element in the other
 - ☐ B the largest distance between an element in one cluster and an element in the other
 - ☐ C the average distance between an element in one cluster and an element in the other
 - ☒ D distance between the centroids of two clusters
 - ☐ E I do not know

5. Complete link is

- ☐ A the smallest distance between an element in one cluster and an element in the other
- ☐ B the largest distance between an element in one cluster and an element in the other
- ☒ C the average distance between an element in one cluster and an element in the other
- ☐ D distance between the centroids of two clusters
- ☐ E I do not know

6. Which of these is the nested algorithm of clustering?

- ☒ A Hierarchical clustering
- ☐ B k-means
- ☐ C Knn
- ☐ D I do not know

7. Which of these is the unnested algorithm of clustering?

- ☐ A Hierarchical clustering
- ☒ B k-means
- ☐ C Knn
- ☐ D I do not know

8. Which of these is the type of hierarchical clustering?

- ☐ A Agglomerative Methods
- ☐ B Divisive Methods
- ☒ C Both
- ☐ D I do not know

9. This function can be used to perform hierarchical clustering in R

- ☒ A hclust()
- ☐ B cluster()
- ☐ C hierarchical ()
- ☐ D I do not know

✓ 10. This function can be used to perform k-means clustering in R

- ☒ A kmeans()
- ☐ B kclust()
- ☐ C kmenscl()
- ☐ D I do not know

✓ 11. Do we need to worry about scaling in clustering?

- ☒ A Yes
- ☐ B No
- ☐ C I do not know

✗ 12. The goal of Cluster Analysis is

- ☐ A That the objects within a group be similar (or related) to one another and different from (or unrelated to) the objects in other groups
- ☐ B That the objects within a group be different from (or unrelated to) to one another and similar (or related) the objects in other groups
- ☐ C That the objects within a group be similar (or related) to one another and the same for the objects in other groups
- ☒ D To classify the object as similar as did in the data
- ☐ E I do no know

✓ 13. Cluster Analysis can be considered as

- ☒ A unsupervised classification
- ☐ B supervised classification
- ☐ C supervised regression
- ☐ D I do not know

✓ 14. Exclusive clustering

- ☒ A Assign each object to a single cluster
- ☐ B Assign each object to more than one cluster
- ☐ C Assign each object to cluster with the highest number of data points
- ☐ D I do not know

✗ 15. Partial clustering can be considered if

- ☐ A some objects in a data set may not belong to well-defined groups
- ☐ B assigns every object to a cluster
- ☒ C assigns every object to a cluster with some probability
- ☐ D I do not know
